WHO WE ARE

Company overview

Maxvolt Energy Industries Limited is an Indian manufacturer of lithium-ion battery solutions, established in 2019 and headquartered in Ghaziabad, Uttar Pradesh.

HUMBLE BEGINNINGS

Started with an initial production capacity of around 15 batteries per day.

EXPANDED HORIZONS

Expanded into a broader energy-storage and electric-mobility solutions company.

CORE BUSINESS

Operates in the electric battery and related components segment.

WIDE APPLICATIONS

Solutions serve electric mobility, energy storage, inverter applications and customised battery requirements.

OUR MISSION

At Maxvolt Energy, our mission goes beyond batteries. We are committed to delivering safe, reliable and sustainable energy solutions that power a better future. By understanding the needs of our customers and communities, we strive to create lasting value and make a meaningful impact on every life we touch.

OUR VISION

We believe in a world where energy brings hope, opportunity and light to everyone. Our vision is to reduce carbon footprints, empower clean urban transportation and integrate renewable energy — all while nurturing the planet for future generations.

*Cleaner Energy.
A Brighter Tomorrow.*

What this means for you

Your role may not directly involve battery engineering or manufacturing, but your work still contributes to the quality, speed, reliability and sustainability of Maxvolt's overall operation.

A STRONGER
PLATFORM FOR
A BRIGHTER FUTURE

DUHAI FACILITY EXPANSION

SCALING MANUFACTURING

The Duhai manufacturing facility was expanded to approximately **55,000 sq. ft.** in December 2025, alongside a **23,000 sq. ft.** corporate office and Centre of Excellence / NPD site.

The induction material states an installed annual capacity of roughly **2.3 GWh** and monthly output of around **40,000** battery packs.

ALIGARH 10 GWH EXPANSION

POWERING THE NEXT PHASE

Maxvolt Energy received a land allotment from the Uttar Pradesh Government (announced by the Hon'ble Chief Minister at the "Uttar Pradesh - Udhya Pradesh" event on International MSME Day, July 2025) for the development of a new lithium-ion battery manufacturing campus at Aligarh, Uttar Pradesh.

The Aligarh expansion is planned in phases. Phase 1 targets **5 GWh**, split between Battery Energy Storage Systems and Electric Mobility capacity. Phase 2 adds a further **5 GWh** for broader market and export demand.

Maxvolt ReEarth

CLOSING THE LOOP FOR A BRIGHTER TOMORROW

From January 2026, Maxvolt ReEarth was incorporated as the dedicated circular-economy subsidiary, extending Maxvolt into collection, second-life use, recycling and future critical-material recovery.

Maxvolt ReEarth strengthens our commitment to a cleaner, circular and more sustainable energy future.

Industry-academia engagement

Research contributions connected with Maxvolt Energy and Maxvolt ReEarth and presented through academic and professional platforms.

Digital transformation

Research into battery traceability and digital systems supporting manufacturing and dispatch management.

Sustainability leadership

Research covering battery recycling, circularity, resource recovery and net-zero transition.

Research-led innovation

Translating Maxvolt's operational and technical work into structured research and published knowledge.

Maxvolt ReEarth

EXTENDING BATTERY VALUE BEYOND ITS FIRST LIFE

Maxvolt ReEarth is a dedicated subsidiary building an integrated ecosystem for battery reuse, recycling and critical-material recovery.

**A cleaner tomorrow
is a stronger tomorrow.**

Giving batteries a second life
and materials a brighter future.

The circular battery lifecycle

FROM END-OF-LIFE TO A BRIGHTER TOMORROW

1. COLLECT

End-of-life batteries are gathered through Maxvolt's collection network.

2. ASSESS

Health grading determines second-life suitability.

3. RECOVER

Black mass and other reusable materials are extracted.

4. REFINE

Materials are processed into battery-grade critical minerals.

5. REINTEGRATE

Recovered materials are returned to the battery value chain.

Phased roadmap

BUILDING CAPACITY FOR A CIRCULAR FUTURE

Phase	Target
Phase 1	Technology validation; laboratory development and pilot testing.
Phase 2	15,000 MT p.a. planned commercial battery-processing capacity.
Phase 3	8,500 MT p.a. planned critical-mineral refining capacity.

Target outcome

99%+

target battery-grade material purity across
Lithium, Nickel, Cobalt, Manganese and Graphite.

RESEARCH & PUBLICATIONS

INNOVATION TODAY. A CLEANER TOMORROW.

Five research papers achieved in 2026

Maxvolt's research initiatives demonstrate a growing focus on innovation, sustainability, digitalisation and advanced battery technologies. During 2026, the organisation and its research team achieved five documented research-paper milestones across battery recycling, manufacturing, digital traceability, circular supply chains and net-zero energy systems.

What this achievement reflects

FROM RESEARCH TO REAL-WORLD IMPACT

- **1 A Comparative Evaluation of Lithium-Ion Battery Recycling Technologies: Pyrometallurgical, Hydrometallurgical, and Direct Recycling Approaches**
Maxvolt ReEarth | Accepted & Published | International Journal of Novel Research and Development
DOI: 10.56975/ijnrd.v11i5.324740  PUBLISHED
- **2 Advanced Manufacturing Processes and Digital System Integration for High-Performance Lithium-Ion Battery Pack Production: A Case Study of Maxvolt Industries in 2W and 3W Electric Mobility Applications**
Maxvolt Energy | Accepted & Published | International Journal of Battery Technology
DOI: 10.34218/IJBTT_07_02_001  PUBLISHED
- **3 Design and Implementation of a Digital Traceability System for Lithium-Ion Battery Assembly and Dispatch Management**
Maxvolt Energy | Accepted & Published | International Journal of Artificial Intelligence and Machine Learning
DOI: Awaited  IN PRESS
- **4 A 6R-Based Circular EV Battery Supply Chain in India: Technology Roadmap and Insights from MaxVolt ReEarth**
Maxvolt ReEarth | Accepted & Published | International Journal of Environmental Sciences
Scopus-indexed, Q3 | DOI: 10.64252/zvndrn48  PUBLISHED
- **5 A Recycling-Integrated Circular Energy System for Net-Zero Transition: The MaxVolt ReEarth Framework for Sustainable EV Battery Management**
Maxvolt ReEarth | Accepted & Presented | National Conference on Net Zero Energy Systems 2026, National Institute of Technology, Jalandhar | Paper ID: 46  PRESENTED

Research excellence as an achievement

Our research translates real operational challenges into practical solutions — strengthening our products, enabling a circular economy and contributing to a cleaner, more sustainable future.

“Research turns today’s challenges into tomorrow’s opportunities.”

WORKING HOURS, ATTENDANCE & LEAVE

HR POLICIES

Clear policies. A more productive you. Here's what you need to know:

Topic	What to know
 Shift timings	9:00 AM – 6:00 PM or 10:00 AM – 7:00 PM 6-day working week.
 Attendance	Marked via Maxvolt One; selfie + GPS where biometric is unavailable.
 Missed punch	Manager approval within 12 working hours, or marked absent.
 Grace period	15 min for morning shift; up to 3 late arrivals/month; 4th onward = half-day deduction.
 Overtime	Applicable to Production, Service, Logistics, Store and Admin.
 Flexi hours	±30 min for eligible departments/levels, fully compensated same day.
 Casual Leave	7 days/year; max 3 days at a stretch; cannot carry forward.
 Earned Leave	15 days/year; usable after probation confirmation; carries forward.
 Sick Leave	7 days/year — Manager & above; medical proof beyond 2 days.
 Paid Holidays	10 days/year; published at the start of the year.

YOUR FIRST 30 / 60 / 90 DAYS

SETTLING IN, STEP BY STEP

A strong start builds a stronger tomorrow. Here's your guide for the first 90 days.

DAYS 1–30 LEARN & ADAPT

Get to know. Get comfortable. Get started.

- ✓ Understand Maxvolt and your department.
- ✓ Complete mandatory induction and role training.
- ✓ Understand your SOPs and systems.
- ✓ Build relationships with your team and key SPOCs.
- ✓ Begin performing assigned tasks with guidance.
- ✓ Understand your initial KPIs and expectations.

DAYS 31–60 PERFORM & IMPROVE

Take ownership. Build momentum.

- ✓ Perform routine responsibilities with greater independence.
- ✓ Meet agreed timelines and quality expectations.
- ✓ Coordinate directly with relevant departments.
- ✓ Identify recurring problems or process gaps.
- ✓ Seek feedback and improve execution.

DAYS 61–90 OWN & CONTRIBUTE

Deliver impact. Grow with Maxvolt.

- ✓ Handle assigned responsibilities independently.
- ✓ Demonstrate ownership and accountability.
- ✓ Consistently meet role expectations.
- ✓ Contribute process-improvement ideas where appropriate.
- ✓ Demonstrate effective cross-functional working.
- ✓ Discuss development needs and next-stage responsibilities with your Reporting Manager.

TOGETHER

BUILD
A CLEANER TOMORROW

MAKE
A DIFFERENCE

SAME ENERGY.
A BRIGHTER TOMORROW.

YOUR FIRST-WEEK CHECKLIST

START STRONG

Get oriented. Build connections. Set yourself up for success.

Read, understand and sign the Code of Conduct.

Learn your role's process and how it connects with other departments.

Understand the customer promise: quality, responsive service and lifecycle responsibility.

Know how your work connects to EV, ESS, OEM or service outcomes.

Ask your team for its operating rhythm, targets and cross-functional interfaces.

Connect with each department's SPOC as per your week's induction plan.

YOUR BUDDY & KEY CONTACTS

SUPPORT WHEN YOU NEED IT

The right support helps you settle in, stay productive and grow at Maxvolt.

Buddy Program

Every new joiner is paired with a buddy — a peer, not your manager — who helps you settle in, answers day-to-day questions and acts as a friendly first point of contact through the first few weeks.

Helpdesk Categories

Need	Where to go
 HR	Leave, salary and documentation queries
 Finance	Reimbursements, tax and payroll
 IT	Hardware, software access and network
 Admin	Facility, travel and stationery
 AskMax	Instant, 24/7 policy answers — no ticket needed

Know the difference

Your Buddy helps with day-to-day settling in. Your Reporting Manager handles work and performance. HR handles employee matters. Helpdesk routes formal support requests. AskMax provides policy information.
